Delivering Confidence Through Innovation, Quality and Value Since 1976

A Part of the Crafcو Pavement Preservation System

Designed for the professional, the Crafcو Super SEALCOATER's standard features are considered options on all other competitive seal coat machines. Quality parts and superior construction make the Super SEALCOATER the machine of choice for everyday rigorous use. Features such as the unbreakable steel tank to the oversize hydraulic system set this unit apart from all the others. Built with Crafcو quality and engineered to last, choose the Super SEALCOATER for your next seal coat machine.

Spray Bar Attachment

Apply sealcoat, emulsions and rejuvenators using the Crafcro Super Sealcoater. The Spray Bar Attachment is designed for projects too large for hand wand operation, making it ideal for parking lots and large pavement areas. The spray bar option installs fast and easy with no additional plumbing.

The Crafcro Super Sealcoater offers two spray bar options to meet different application needs and preferences. Option one is a manual spray bar kit and option two is an automated spray bar kit.

A pneumatic switch activates the spray bar for material application from the operator rear seat position. The spray bar has two positions, one for transport and one for application.

All Crafcro Super Sealcoaters (550 & 800) can be retrofitted for this option.

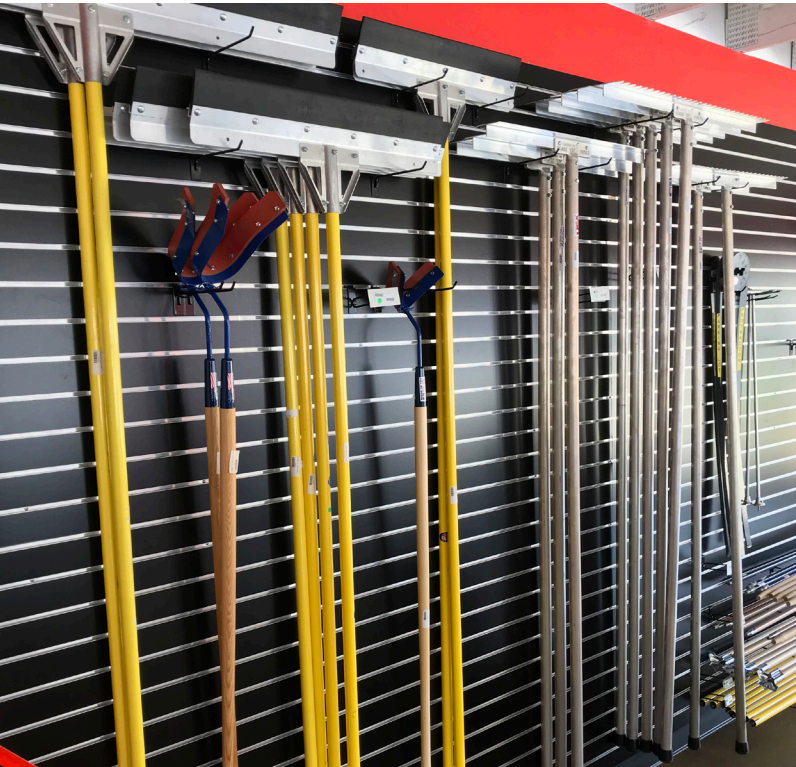

Action Pave®

Action Pave Sealer

Crafco's Action Pave® heavy-duty sealers are formulated to preserve your most valuable surfaces by delivering maximum protection against harmful elements, while providing a rich, new black color to pavement. Quality formulation, consistent performance and extensive testing throughout the manufacturing process – it's no surprise Action Pave® sealers are engineered for success.

Visit any Crafco Pavement Preservation Supply Centers and sealer distributors located across the country, or shopcrafco.com to get the sealcoating supplies you need.
